

« Eco-sustainable Golf course » Ecolabel

ECOCERT Group affirms as the skill centre reference in France, Europe and around the world, in the recognition of sustainable management approach, for products, management systems and ecological management of territories.

What is it?

The « **Eco-sustainable Golf course** » standard is an ecolabel developed by ECOCERT. This initiative answers to different public authorities and private companies wishes and was created with an experts and green spaces of golf professionals committee. Beyond the adapted management's principles included in this ecolabel, it helps considering sustainable development in the golf course's green spaces management.

The « **Eco-sustainable Golf course** » ecolabel is intended for promoting the sustainable practices within the golf course's green spaces management.

For green spaces managers, this is both:

- A **Management Tool** for sustainable practices
- A **Guidance** to go further in changing practices
- A **Motivation Factor** for technical teams
- A **Quality Proof** for users

How does it work?

The « **Eco-sustainable Golf course** » certification is awarded to an area after an audit which checks that the management is faithful to the standard. Every kind of golf course's green spaces may be concerned by this eco-label: landscaped natural spaces, public or private, artificial space, greens, fairways, roughs...

To guide you in your ecological and sustainable management process, we are able to do a provision of a pre-diagnostic.

This 1-day service can be divided in two steps:

- Training to « **Eco-sustainable Golf course** » standard's issues and criteria,
- Diagnostic on field of golf course's green spaces.

A complete pre-diagnostic report will be written and will constitute a real action plan.

The training of the technical staff can be defined according to the goals and priorities of the sustainable management of the green spaces.

« ECO-SUSTAINABLE GOLF COURSE » ECOLABEL WILL BRING YOU
RECOGNITION AND PUBLIC READABILITY
