

ECOLOGICAL MANAGEMENT OF TERRITORIES

ECOCERT Group affirms as the skill center reference in France, Europe and around the world, in the recognition of sustainable management approach, for products, management systems and ecological management of territories.

Ecological management and territories

ECOPASS - Groupe ECOCERT is the ecological management of territories projects accompaniment specialist, such as:

- **Green spaces** (Ecological Green Spaces - EVE certification),
- **Sustainable farming**,
- **Forest** (management and agroforestry),
- Every kind of **territory** which management has to be recognised: natural spaces, drainage areas, agricultural areas...

ECOPASS proposes provisions concerning ecological management of territories:

- Certification **audits** and **pre-audits**,
- **Standard** writing **accompaniment**,
- Projects' value increasing accompaniment,
- **Energetic diagnostics** on farms,
- **Trainings**.

Ecological Green Spaces certification

Ecological Green Spaces - EVE® label is an "ecolabel" developed by ECOCERT. This initiative answers to different public authorities wishes and was created with an experts and green spaces professionals committee. Beyond the adapted management principles included in this ecolabel, it helps considering sustainable development in the green spaces management.

The « Ecological Green Spaces » standard is intended to promote the ecological practices within the green spaces management.

For green spaces managers, this is both:

- A **Management Tool** for ecological practices
- A **Guidance** to go further in changing practices
- A **Motivation Factor** for technical teams
- A **Quality Proof** for users

More than 80 green spaces have been certified since 2006 on different kinds of french public authority area.

ECOLOGICAL MANAGEMENT OF TERRITORIES

The ECOCERT brand

An established rightfulness

ECOCERT is an historic and enlisted protagonist of the organic certification. ECOCERT has become the worldwide leader on this service.

A coherent service with our values

Cleave to its values, ECOCERT contributes to environment care by developing standards which accompany your progress initiatives and designed to add value to your ecological practices.

Our fame at your service

ECOCERT's recognition by users is a real asset for your own initiative's credibility for users. ECOPASS proposes the use of the ECOCERT Environment logo:

Media partner for your communication actions

Awareness vector for public

Ecological Management of Territories projects of certification are an opportunity to increase users' awareness of environmental issues and your sustainable development will.

Support to local councillors and managers for their communication

ECOCERT's Communication Department is available in order to examine together different commercial actions.

Media coverage of the award ceremony

ECOCERT is ready to present you the certification attestation: media coverage may be planned beforehand.

Accompaniment service

Provision of a pre-diagnostic

ECOCERT proposes a 1-day accompaniment in order to make protagonists aware of your move and to draw up a diagnostic of your commitment level. A complete pre-diagnostic report will be written and will constitute a real action plan.

Training actions

ECOCERT develops for you a training actions catalogue specialised into best sustainable management of territories practices.

An expert network to answer to your questions

Pooling good practices, our auditors and experts team is available to help you to answer to specific demands of sustainable management of green spaces.
