

## MANAGEMENT SYSTEMS AND SOCIAL RESPONSIBILITY

Within the Ecocert group, the Ecopass branch is dedicated to the development of environmental and sustainable strategies.

It offers you recognition for the following standards:

- **Environment:** ISO 14001 or EMAS (Eco Management and Audit Scheme) European regulation;
- **Ecocert standard for Ecological Green Spaces**
- **Carbon Balances™**
- **Social Responsibility: ISO 26000 Assessment**

Ecopass also allows organizations of all sizes to get recognition for:

- **Health and safety in the workplace:** OHSAS 18001
- **Quality:** ISO 9001, integrating the process approach and your indicators
- **Food safety:** ISO 22000, focused on preventing and controlling your risks in terms of consumer health (prerequisite program and HACCP principles)

### International Standard for social responsibility - ISO 26000

The objective of ISO 26000 is to produce a guidance document, to assist organizations in addressing their social responsibilities. It emphasizes performance results and improvement.

To help you follow the guidelines of ISO 26000, we offer you our "ISO 26000 Assessment":

- Analysis of your strategy and validation of your management system implementation for corporate social responsibility.
- Confrontation of this strategy in domains defined by the ISO 26000.
- Proposition of axes of improvement for the evolution of your projects.

## MANAGEMENT SYSTEMS AND SOCIAL RESPONSIBILITY

### Our offer:

Our "ISO 26000 Assessment" is progressive with three levels of analysis:

- Level 1: Analysis and validation of your strategy
- Level 2: Analysis of the means implemented to reach the objective of sustainable development
- Level 3: Global validation of the management system; study of the acceptability by the stakeholders
