

**What documents need to be  
provided for packaging's  
approval?**

Packaging must be done with the utmost respect for the environment. You can choose who will get this part approved, the packaging manager or the marketing manager.

**Important points to note:**

- Provide us with a technical data sheet for packaging items specifying all materials used. For non-biodegradable materials, you must provide us with a recyclability certificate for the packaging in question.
- Use of PVC or polystyrene foam is forbidden.
- Use of materials resulting in the death of animals is forbidden.
- If a technical, material or commercial impossibility prevents you from complying with the points above, please provide us with a declaration justifying your choice of packaging item. Your application will be studied in depth and derogation may be granted.
